

1. Binary to Decimal

```
main.c
1 #include <stdio.h>
2
3 int main()
4 {
5     int binary, decimal = 0, base = 1, rem;
6
7     printf("Enter a binary number: ");
8     scanf("%d", &binary);
9
10    while (binary > 0)
11    {
12        rem = binary % 10;
13        decimal = decimal + rem * base;
14        binary = binary / 10;
15        base = base * 2;
16    }
17
18    printf("Decimal number = %d", decimal);
19
20    return 0;
21 }
```

Output

Enter a binary number: 1010
Decimal number = 10

=== Code Execution Successful ===

2. Decimal to Binary

```
main.c
1 #include <stdio.h>
2
3 int main()
4 {
5     int decimal, binary = 0, base = 1, rem;
6
7     printf("Enter a decimal number: ");
8     scanf("%d", &decimal);
9
10    while (decimal > 0)
11    {
12        rem = decimal % 2;
13        binary = binary + rem * base;
14        decimal = decimal / 2;
15        base = base * 10;
16    }
17
18    printf("Binary number = %d", binary);
19
20    return 0;
21 }
```

Output

Enter a decimal number: 10
Binary number = 1010

=== Code Execution Successful ===

3. Binary to Octal

```
printf("Enter binary number: ");
scanf("%d", &binary);

while (binary > 0)
{
    rem = binary % 10;
    decimal = decimal + rem * base;
    binary = binary / 10;
    base = base * 2;
}

base = 1;

while (decimal > 0)
{
    rem = decimal % 8;
    octal = octal + rem * base;
    decimal = decimal / 8;
    base = base * 10;
}

printf("Octal number = %d", octal);

return 0;
```

Enter binary number: 1010
Octal number = 12

=== Code Execution Successful ===

4. Binary to Hexa Decimal

```
1 #include <stdio.h>
2
3 int main()
4 {
5     int binary, decimal = 0, rem, base = 1;
6
7     printf("Enter binary number: ");
8     scanf("%d", &binary);
9
10    while (binary > 0)
11    {
12        rem = binary % 10;
13        decimal = decimal + rem * base;
14        binary = binary / 10;
15        base = base * 2;
16    }
17
18    printf("Hexadecimal number = %X", decimal);
19
20    return 0;
21 }
```

```
Enter binary number: 1010
Hexadecimal number = A

=== Code Execution Successful ===
```
